Your utility services are the products of American methods of doing business.

With only 7% of the world's population, the United States, in 1947, produced about 45% of the world's electricity.

Building for present and future needs of communities served is a continuing long range program of this company.

"SALIDA THE HEART OF THE ROCKIES"

Page 7

At the Junction of America's "Main Street" U. S. 50 and U. S. 285 about 150 miles south of Denver, lies Salida, Colorado, Chaffee County Seat, or the "Sweet-heart of the Rockies".

The Name Salida is derived from the Spanish, meaning "Gateway" or "Exit" Hence the towns slogan "Salida the Gateway to the Passes".

With towering mountain peaks as a "back-drop" Salida offers a scenic beauty seldom surpassed. A natural playground where municipally owned ski course, mineral hot water swimming pool and nine hole golf course, with modern club house, give its 5000 citizens and the many tourists year around relaxation.

Salida primarily is Railroad, Mining, Cattle raising and Agriculture being the division point on the scenic Denver & Rio Grande Railroad. The D & R G Hospital is also maintained here with seven surgeons on their staff. Koppers Creosoting Plant which supplies railroad ties, power line poles and posts located here, is one of their larger plants thru-out the U. S. having a larger capacity than the plant which is located at Denver.

Salida enjoys an all year ideal climate, protected from the storms by high mountain ranges, and peaks, many over 14,000 feet which entirely circle the valley, the summers very seldom see temperatures higher than 90 and the winters much below zero. With a mean annual temperature-24 years of 48.2, mean monthly low-24 years-for December 27.1, mean monthly high 24 years July 65.0 and an annual precipitation of 12.27 inches, Salida enjoys approximately 320 clear days annually.

Salida houses the worlds largest trout farm "Frantzhurst" which was featured in the Saturday Evening Post week of April 24th 1948 edition. Tenderfoot mountain which rises 500 feet with a spiral drive which was built entirely with volunteer citizens work, with every curve named after the person or persons who participated.

Salida and Chaffee County are rich in natural resources having within its boundaries monumental granite, fluorspar, feldspar, calcium carbonate in crystal form, travertine (with one of the few quarries in the U. S.), asbestos, marble terrazzo (used for flooring), lime rock, mineral metals including lead, zinc silver, copper and gold, and recently, many rare earths, with an annual sales value of over a million dollars.

The major portion of the \$22,260,607.00 total production in gold, silver, copper, lead and zinc credited to the County from 1869 to 1944 inclusive by the U. S. Bureau of Mines came from two districts, Monarch and Chalk Creek District, which together produced nearly 90% of this total. The Modonna at Monarch is credited with a total production of slightly over \$5,000,000 while estimates show more than double this figure to have come from the old Mary Murphy at Chalk Creek.

The County seat was moved from Buena Vista by popular vote in 1932 to Salida where is located one of the finest County buildings in the State. This building, as well as the County itself, is free of all indebtedness.

Chaffee County is blessed with many radio-active hot mineral springs, of which several have been developed and are giving curing aid to many. Among these are the famous Poncha Hot Springs, whose water has also been piped some six miles and is now used in the Salida Municipal Swimming Pool and Baths as well as at Poncha Springs.

Dr. Marquard's "Round Up Lodge" for boys located between Salida and Buena Vista, up famous Chalk Creek Gulch is one of the finest boys camp in the United States bringing teen agers here from every state in the Union each summer to enjoy hearty outdoor recreation. A Fox Movie Tone news cameraman photographed this Lodge along with Frantzhurst Trout Farm last summer, so be looking for it in the News reels.

Bordered with two famous trout streams the Arkansas and the South Arkansas River and many high mountain lakes the fisherman's dream can really come true. The Arkansas River has the longest stretch of unposted water in the State some 140 miles of open fishing. Big game hunters have also found this territory to their liking, during season it is impossible to count the red caps and red shirts milling around on the down town streets, with cars checked from all over the U. S. during seasons.

Two world phenomenas can be seen from Salida during certain seasons. The famous "Angel of Shavano" high up on Mt. Shavano, elevation 14,222 feet and the initials F. S. on Mt. Ouray which are interpreted to mean "Friendly Salida".

The "Angel of Shavano" has been featured with pictures in many National daily papers.

Chaffee County's agricultural and livestock record is also outstanding. It counts 316 farms with lands totaling 140,195 acres of which 19,720 are under irrigation. The average farm has 443.7 acres, and these farms produce 5,000 tons of hay;

NEW CATTLE AND BEEF GRADES

1951

Livestock producers who read U.S. Department of Agriculture market reports during 1951 should bear in mind that the grades of livestock have been changed to agree with the new carcass grades for steer, heifer and cow beef.

The live animal grades are available as guides to all who wish to use them, but they are not applied officially by USDA except as they are used by USDA market news reporters in providing a nation-wide price reporting system.

Changes follow the carcass grade revision closely and in addition some of the terminology is being made more uniform. In brief, the slaughter (live) animal grades to be used by market news reporters are:

OLD GRADE	NEW GRADE	DESCRIPTION
Prime	Prime	Finest finished animals coming to market.
Choice	Choice	Generally quite young in age.
Good	Choice	Highly finished animals. By far the largest number of finished animals coming to market, fall in this grade.
	Good	A new grade. Includes young cattle previously in the top half of the medium grade.
Medium	Commercial	This grade gives these animals a separate grade of their own. Remainder of the Medium grade. Includes lower quality young animals and well finished older steers and cows.
Common	Utility	Mostly cows and young animals of poor quality.
Cutter	No change	These animals produce beef used mostly for processing.
Canner	No change	These animals produce beef used mostly for processing.

In addition, the names for two grades for bulls and stags have been changed. Medium grade is now Commercial and Common is Utility.

GESTATION PERIOD

AVERAGE PERIOD OF GESTATION

	Days	Normal Variation
Mare	336	323-341
Cow	282	274-291
Ewe	150	140-160
Sow	113	110-116

DURATION OF HEAT

	Average	Normal Variation
Mare	6 days	2-11 days
Cow	16-19 hours	Very variable
Ewe	35 hours	Variable
Sow	2-3 days	1-5 days

IF NO CONCEPTION HEAT RECURS

	Days	Normal Variation
Mare	16	Extremely Variable
Cow	19½	16-24 days
Ewe	16½	Variable
Sow	21	18-24 days

## MEMORANDUM

## SALIDA STREET & AVENUE GUIDE - 1951

In the following list the streets are arranged in alphabetical order. The number of each building on the street is given in numerical order, and opposite the number is placed the name of the occupants or houseowner or tenant. In the business blocks containing offices, the occupants are shown by room numbers where practicable; in apartment homes the number denotes the number of the apartment. In all streets both sides of the street are included in one list. The symbol \* following a householder's name indicates that we have received information during the canvas that the house is owned by some member of the family, but as the publisher cannot and does not guarantee the correctness of the information furnished, nor the complete absence of mistakes, no responsibility for errors can be or is assumed, nor can the publisher furnish further information than that shown. The telephone number follows the names of the householder and the number in parenthesis indicates the number in the family.

### B STREET

- 103 Mountford Dick T Miss (1)
- 107 Hedrick John H 584 (2)
